
LOOK OUT FOR:
ASIATIC LION એશીયાઇ સિંહ
Panthera leo persica
HABITAT: The forests and fields of Gujarat, India
RANGE: Gujarat, India
EATS: Chital deer, nilgai antelope, occasionally buffalo and cattle
CONSERVATION STATUS: Endangered. With a growing population, the Asiatic lion is a conservation success story, but they still need our help.
FACT: Asiatic lions have a flap of skin that runs along their belly which African lions don't have. This belly flap is a mystery to science; nobody knows what it's for.
